

Sunflower

Description

This family of LED-based ceiling lamps is a collection of three different models. The body of the lamps is a “sunflower” heat sink (a cylinder with extruded aluminium flaps). The extrusion has both aesthetic and cooling purposes and is shaped to obtain evocative metal flowers, paper lanterns and modernistic lamps. The 20 Watts LED source has optics in a range of narrow, medium and wide beam angles thanks to the chance to assemble three different types of optics.

Additional Information

Supplier	ROTALIANA
Country	Italy
Finishes	White or Bronze
SKU	RO S/SUNFLOW
Globe	20W LED - 1240 lumen
IP Rating	N/A
Colour Temp	N/A
